

Westfalen Group

PROTECTION FROM BREAK-IN, SABOTAGE, ESPIONAGE, THEFT AND VANDALISM

THE CLIENT

As a technology company in the energy industry, the **Westfalen Group** is represented by 23 affiliated and associated subsidiaries in Germany, Belgium, France, the Netherlands, Austria, Poland, Switzerland and the Czech Republic.

The family business was founded in 1923 and has more than 20 industrial sites in Europe. Its headquarters are in Münster and the company employs over 1,700 people.

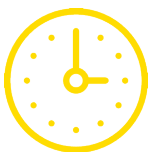

The Westfalen Group's business areas of gases, energy supply and filling stations are part of the critical infrastructure (KRITIS), which ensures that the company's fundamental functions are to be maintained even in a crisis.

THE CUSTOMERS' REQUIREMENTS

The Westfalen Group will optimise and centralise current security measures in order to protect the company premises against burglary, sabotage, espionage, theft and vandalism.

The client requests:

- a uniform security system that analyses alarms from different locations via a central control centre and coordinates follow-up measures
- a significant reduction in the time required for the deployment of emergency and rescue services through predefined alarm/action sequences
- documentation of all kinds of events by video image. If required, these have to be retrievable within a few seconds
- compliance with the basic data protection regulation (GDPR)
- the integration of previously existing hardware into the new Geutebrueck solution
- personal and immediate proximity in project development, planning, support, installation and commissioning
- comprehensive training of security personnel and a long-term service and maintenance contract

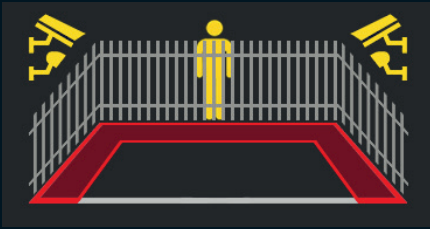

Saves time by displaying procedural instructions for rescue forces

More efficient, centralized handling of alarms by trained personnel

Integration of consisting systems into a complete solution

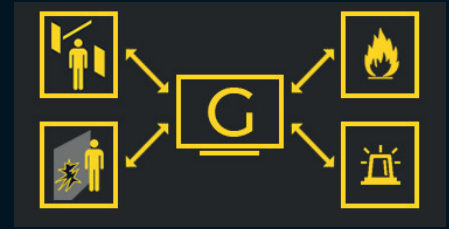

End-to-end perimeter monitoring

Nobody enters the compound undiscovered

Centralization

Monitor and secure multiple locations centrally

Integration

All existing security systems are interlinked

THE GEUTEBRÜCK INDIVIDUAL SOLUTION

Geutebrück is a specialist for the protection of critical infrastructure.

For many years the company has been equipping international authorities, research institutes, energy suppliers or forensic institutions with durable, fail-safe, investment-safe and (backward) compatible solutions.

The individual solution for the Westfalen Group includes:

- the highly available, intelligent Geutebrück software G-Core and G-SIM
- the use of a video and security system for perimeter and area surveillance
- the automatic object identification and tracking
- a comprehensive video documentation
- identification, documentation and optimization of procedures and processes
- a multitude of interfaces to easily integrate the Geutebrück hard- and software

SERVICES AND SUPPORT

Geutebrück is handling the project engineering, planning, support, installation and commissioning as well as service and maintenance.

Employees are trained by Geutebrück in handling the system, so that all users are able to operate the hardware and software in accordance with their individual authorization of access.
